

Your Local Life Safety & Security System Maintenance Support Partner

Vindex Systems are based within the **Manor Royal Business District** and want to help local businesses.

This summer, on top of the reduced rates that we already provide local businesses, we are offering all companies based on the Manor Royal estate a further **10% discount** on annual maintenance contracts*.

Our company specialises in the supply, installation and maintenance of a variety of life safety and security systems, including Fire Detection & Alarm, Intruder, CCTV, Access Control and Emergency Lighting Systems, all designed to help protect our clients, their premises, their assets and their staff.

As well as having a wealth of experience and technical competence, we are NSI Gold accredited and quality insured to ensure we provide the highest standards possible.

As standard we include an initial health and compliance review and will assist to ensure you are up-to-date on all current legislative requirements. Our maintenance contracts also include an emergency call-out facility, 24 hours a day 365 days a year.

We maintain a commitment to having real people respond to problems, including outside of work hours. An operator is always available to pass information directly to an engineer who will then make contact straight away to help with an immediate assessment.

To take advantage of this offer and our fresh approach to service management, please give us a call. We want to help manage your risks and save you money.

*Offer is open until 30th September 2014 and subject to Vindex Systems terms of sale.
